

## TECHNICAL DATA SHEET

**Name:** Diesel Oil Additive / Diesel Lubricity Improver

**Composition:**

The product is a blend of organic esters and acids with anti-corrosion and detergent/dispersant additives.

**Properties:**

Property	Specification	Test Method
Appearance	Clear Dark Amber liquid	Visual
Density at 20°C	0.87 – 0.93	ASTM D-1298
Kinetic viscosity @40°C cst	12-21	ASTM D-445
Flash Point (COC)	120°C min	ASTM D-92

**Application:**

RCP-DOA is very effective for all Indian Diesel fuels as per IS 1460:1995 The recommended dosage rate is 30 -40 ppm w/w, depending on the severity of diesel fuel, for passing the lubricity requirement as per BOCLE (Average WSD, friction co-efficient & contact potential) evaluation method.

**Packaging:**

The product is supplied in 180 Kg net MS Barrels.
